w. My certificate from UCB in the Full-Stack Web Development program has aptly prepared me to take on the front and back end of projects but I have a fondness for UX and design as I got my second degree in Art at UCSC. In the Full-Stack Web Development program I worked with others where I was able to demonstrate skills in communication, project management and self-sufficiency. I have 3 years experience creating projects in Python then JavaScript. I completed my Python classes with high grades and the projects I collaborated on in the UCB program received glowing reviews from instructors. My degree in Cognitive Science with a focus in AI focused heavily on tech and user experience. I am passionate about accessibility and making apps for disabled people and websites that are easy for all to navigate. Using design knowledge that I obtained through my Art degree I hope to make elegant, interesting applications that are also easily accessible for people of all abilities.

Skills

Languages: Javascript, Python

Applications: Web Development

Tools: HTML, CSS, React, Node.js, RestfulAPIs, MongoDB, graphQL, SQL

Projects

Monster-Safe | UCB

Back-End Development

Summary:

The purpose of this project was to create a site that gave updated covid stats for each of the 50 states so that users could take calculated risks while traveling.

Responsibilities:

Implementing the web API and working on the local Storage aspect to save past searches and the users home state.

Technologies:

Javascript, Local Storage, RestfulAPIs

Extension-Pass | UCB

Front End CSS Development

Summary:

The purpose of this project was to create a site that acted as a travel blog with features similar to reddit with upvotes and comments for users to interact with one another.

Responsibilities:

Front-end css styling and Handlebars modifications

Technologies:

Javascript, SQL, Bulma CSS, Handlebars

Registered Behavioral Therapist

September 2021 - May 2021

ACES Autism Therapy

Santa Cruz, CA

- Enhanced desired skills and behaviors in my client through play and developed a strong bond
- Desired Skillset and Behavior marks were met each month and my performance reviews reflected the positive change in my client
- With my guidance and leadership my client and I's rapport was excellent and she was very willing to follow instructions and try new and challenging things.
